

## EURONAV'S ROAD TO DECARBONISATION

### VIRTUAL EVENT ON MAY 5<sup>TH</sup>, 2022

The Paris Agreement, which is a legally binding international treaty on climate change, was adopted by 196 Parties at COP 21 in Paris in 2015. Its goal is to limit global warming to well below 2 degrees Celsius, preferably even to 1.5 degrees Celsius, compared to pre-industrial levels. To achieve this long-term temperature goal, countries, industries, and companies aim to reach global peaking of greenhouse gas emissions as soon as possible and many have committed to achieve a climate neutral position by 2050.

The International Maritime Organisation (IMO)'s greenhouse gas strategy specifies a reduction in CO<sub>2</sub> emissions per transport work of at least 40% by 2030 compared to 2008 levels and a reduction in total annual GHG emissions of at least 50% by 2050 compared to 2008 levels. Whilst these are ambitious goals many believe that they will soon be revised in order to achieve full shipping decarbonisation by 2050.

As the world's largest independent quoted tanker company engaged in the ocean transportation and storage of crude oil, Euronav is uniquely placed to develop sustainable business within the energy transition. The last few months the Company has set a decarbonisation strategy that not only aligns with the emission reduction targets of IMO 2030 and IMO 2050, but even exceeds them in order to be fully aligned with the Paris agreement.

Hugo De Stoop, CEO of Euronav: "We need to push forward, even when the sector, or the wider playing field, including politicians and governmental organisations, does not. We believe that the efforts made today, will benefit our stakeholders in the long term. Moreover, as a leader it is our responsibility to drive sustainable business within the industry to guarantee its future relevance."

On May 5<sup>th</sup> 2022, Euronav will present its decarbonisation strategy and targets through a virtual event. Join us, and our experts, and discover our **road to decarbonisation**.

## AGENDA

The event will start at 9 am EST, 3 pm CET, and last about 90 min.

1. *Sustainability at Euronav*
2. *Expert Talks*
  - Konstantinos Papoutsis, Sustainability Manager
  - Rustin Edwards, Head of Fuel Procurement
  - Alex Staring, Chief Operating Officer
  - Lieve Logghe, Chief Financial Officer
  - Michail Malliaros, General Manager ESMH
  - Zois Dagkaris, Deputy General Manager ESMH
3. *Decarbonisation Strategy*
4. *Conclusion*
5. *Q&A*

## REGISTRATION

People interested can register via the following link: <https://euronav.connectid.cloud/register>.
