

# IT DEVELOPMENT MANAGER

**EURONAV ANTWERP OFFICE**

## Company Profile

---

Euronav owns, operates, and manages a modern fleet of ocean going tankers. We are dedicated to the safe, clean and reliable transport of crude oil worldwide.

We strive to engage, empower and reward our people, both onboard and ashore. The combination of young vessels, experienced staff, performance culture, and in-house management enables us to achieve outstanding growth and sustainability in an extremely competitive industry.

## Position Profile and Requirements

---

### PRIMARY AIM

As the Euronav brand continues to expand, you will be responsible to ensure an effective IT Development Strategy for the full Group which consists of multiple offices and +70 vessels that are truly global in nature.

You will manage, train and support an application development team of +/- 5 staff (internal / external). Liaise with the Group IT Manager (Head IT & Innovation) to ensure Euronav makes best use of its developers as well as accomplish the objectives set by the business in respect of application development.

You should have extensive experience working in an IT environment with a solid knowledge of business principles. Furthermore, you will analyse/investigate and propose new systems and tooling to the business which might automate their business processes and reduce their daily workload. Euronav is developing on a full stack Microsoft platform, on premise as well as Azure.

### ROLES AND RESPONSIBILITIES

- Manage a team of internal and external IT developers and data engineers to deliver robust system integrations and other innovative developments and data streams.
- Plans, assigns and directs the activities of professional and technical personnel (internal & external) involved in the design, development and systems analysis functions required to create new applications / programs or install and implement software purchased from outside vendors.
- Responsible for the Euronav system landscape of applications including interfacing and connection through an Euronav API and optimized connectivity to the Power BI platform
- Implement and manage a clear data strategy for Euronav in respect of (big) data governance, system interconnectivity, data security and data assurance in Ms Azure.

# IT DEVELOPMENT MANAGER

EURONAV ANTWERP OFFICE
